FREQUENTLY ASKED QUESTIONS

How do I connect this battery into my existing system?

These batteries use a standard M8 terminal. This battery can be connected directly to the on-board wiring system. You may also purchase additional cables from BigBattery.

How many times can I put this battery in parallel/series?

These batteries are not series capable but can be connected in parallel up to sixteen times. Make sure that the total amount of these batteries in your configuration never exceeds sixteen total batteries. When connecting batteries in parallel, ensure all batteries are at the same voltage.

How long will my battery last, and what do I do at the end of its life?

Lithium iron phosphate (LiFe-PO4) batteries can be cycled from 3500 - 6000+ times. If you cycle the battery daily then you can get more than 12 years of use from your battery. When your battery is at the end of its lifespan, contact us and we'll re-cycle it for you, free of charge!
